

## CARAVAN COMPACT LEVELSYSTEM

### The best choice for any caravan user

E&P Hydraulics again sets a new benchmark for stress free and comfortable levelling. The **Compact LEVELSYSTEM** takes a unique position in the caravan market.

With an unequalled 2 minute levelling time, using ONLY 2 hydraulic axle-jacks, the automatic **Compact** system is the obvious choice of any caravan enthusiast who wants to optimise their holiday experience with a “gold winning” levelling performance and great design !

Two specially designed axle supports enable the user to position the caravan to their preferred position, ensuring the best ergonomic use.

The automatic **Compact** system is ideally suited for the more budget conscious caravan lover who would prefer not to go for the Complete 6 support levelsystem.

Thanks to the latest software development it enables the **LEVELSYSTEM** to extend and retract the hydraulic jacks safely and efficiently.

There is also an optional hand-held remote control unit to make using the system even more enjoyable !

## General information

The **Compact LEVELSYSTEM** – a pioneering, effective and simple-to-use- system, worth its weight in gold for caravan owners.

## Cost of Ownership

Perfect for those caravan owners who still want stability, security and assistance with tricky side-to-side levelling, at a more affordable cost.

## Ergonomics and ease of use

The **Compact LEVELSYSTEM** uses just 2 axle jacks, both of which are deployed using the control panel or the wireless hand-held remote control, giving you full control over the stabilising process. The jockey wheel and existing corner steadies can then be wound down manually as normal to aid with the levelling.

## Flexibility

Effortless levelling in less than 2 minutes. The E&P LEVELSYSTEM keeps you mobile and flexible, yet safe and secure. Forget messing around with jacks, blocks and spirit level. Simply..... Arrive, Push Button, Relax.
