

Motorhomes **2009**

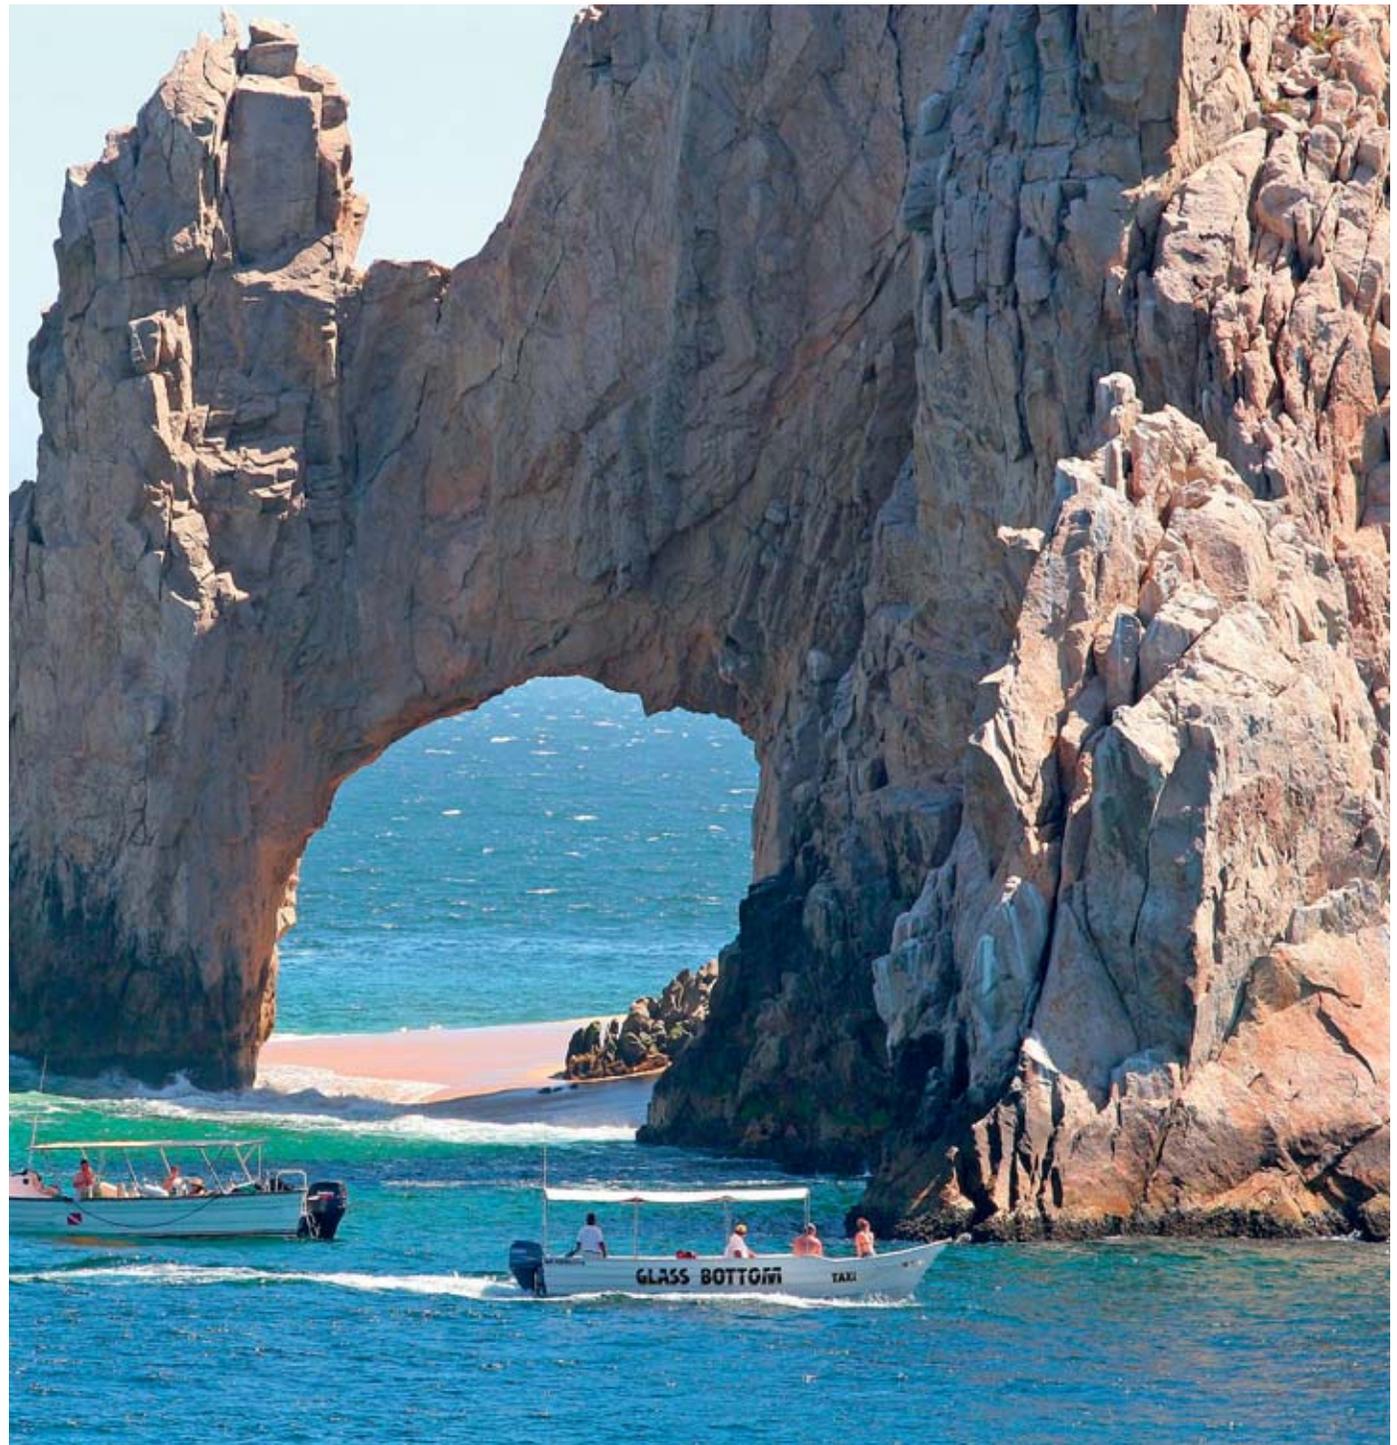

Welcome

2

Trust that good feeling of yours ...

Holidays are a precious time. No rushing around, no obligations. With a Bürstner motorhome you can confidently move about in a world of comfort. That's what makes the trip so relaxing. Right from the start. Discover the pleasure of recreation and holidays in a special and different way. And just take a break from everyday life.

Enjoy quality at its highest level – our 50 years of experience guarantee it. Whether it's an entry-level model or a luxury version – in a Bürstner, you'll feel right at home, right away. And you can let go and unwind. Everything seems familiar and reliable, allowing you to feel completely at ease.

Bürstner turns 50:

50 years of unlimited comfort and well-being

Delphin, 1962

Alcove, 1988

T 550, 1988

I Class, 1997

Today, Bürstner is one of the leading manufacturers of caravans and motorhomes. It's been a long journey, but certainly well worth it. Especially for the scores of satisfied customers who, year after year, enjoy hours and hours in their Bürstner motorhome. They benefit from the company's 50 years of experience. From the passion for distinctive design and the many unique innovations and sophisticated detailed solutions. After all, Bürstner has been building leisure vehicles since 1958.

Customer satisfaction with the Bürstner brand is not only a result of the products' high level of quality. Specifically, it's based on the tried-and-tested claim

we've lived up to time and again: Anyone who is out and about with a Bürstner should feel an unlimited sense of well-being. All ideas, concepts and implementations are focused on this requirement – in all model ranges, back then as well as today. And the same will hold true in future. So that our customers in future will also be able to say: „Unlimited well-being? With a Bürstner, of course.“

The Bürstner company's roots go back to 1924, when Jakob Bürstner founded a large carpenter's and joiner's workshop in Kehl-Neumühl in Baden (Germany). Since that time, the company has been involved in woodworking and refining, and thus has

the highest level of competence in that field. At the end of the 1950s, the company began constructing its first caravans.

A constant increase in demand necessitated the creation of additional production capacity. As one of the first companies to do so, Bürstner ventured into France in the mid 1970s. The company took over a furniture factory in the Alsatian town of Wissembourg, which today is among the most modern production plants in the industry.

Bürstner is also considered a pioneer when it comes to motorhome production. For more than 20 years,

motorhomes have been a permanent feature in the company's range of products.

Bürstner has set new standards in the industry, not only in terms of its products but also in terms of customer service. In 2004, the Customer Service Centre, a roughly 16,000-m² new facility, was inaugurated. Bürstner's range of models can be admired there in an attractive showroom. In addition, the spare parts supply for all of Europe is managed from that location. Even in future we will do our utmost to ensure that you experience unlimited well-being.

Design and ambience: A treat for all the senses

Aesthetics in motion: Shapes, colours and design

As much an individual as you, as unique as your wishes and dreams – that's also how distinct a Bürstner motorhome is. With striking colours, succinct outlines and sweeping lines it stands out from the crowd of ordinary vehicles on the road.

With character and individuality it honours the demand for elegance and timeless modernity. Through harmony and style it manifests class. Creatively shaped wall elements, light fixtures, accessories and fittings produce a lively visual effect that expresses a sense of passion for exceptional design. Because Bürstner places great emphasis on individuality, you can modify our

vehicles in accordance with your specific taste and style by choosing from a wide range of colour and design options. That way, your Bürstner will rightly express your personality. In doing so, design and technology will complement one another in absolute perfection, both inside and out.

After all, a Bürstner motorhome is specifically planned and constructed to satisfy your wishes and requirements, so that you will immediately and always have this reaction: It suits me, I have a feeling of unlimited well-being.

Well-being based on innovations and functionality

Relax with the highest degree of comfort

We are always looking out for your well-being and satisfaction when it comes to developing and implementing innovative ideas for your home on wheels.

Our goal: not only to meet your expectations with regard to quality, engineering, design and furnishings, right down to the last detail, but to exceed them as well. After all, you should feel unlimited well-being during the most precious weeks and days of the year.

That's why our engineers, interior architects and designers are constantly doing their utmost to

find new solutions to make travelling in a Bürstner motorhome even more agreeable.

The revolutionary fold-down bed in the low-profile class, the space-saving bathroom called the VarioBad and the comfortable Reliner bench seat are just a few examples of how we do all we can to make the nicest time of the year even nicer and more comfortable. Welcome to the nicest time of the year. Welcome to the world of Bürstner.

novalife®: The leather-like high-tech material. Dirt-repellent, hard-wearing and easy to clean. Available as an optional extra.

Winner of the Caravanning Design Award in 2006/2007.

CARAVANNING
DESIGN AWARD 2006/2007
INNOVATIONS FOR NEW MOBILITY

VarioBed: By day, a cosy island of calm; by night, a comfortable double bed, incredibly spacious – the sliding mechanism makes it possible.

Premiere: Clever solution for more seating in a low-profile – the fold-down bed over the seating area. Thanks to the drop-down mechanism it's a breeze to use. Loss of space: practically entirely eliminated.

VarioBad: Freedom of movement guaranteed – because the wash basin can be swung to the side (dependant on the model/floor plan).

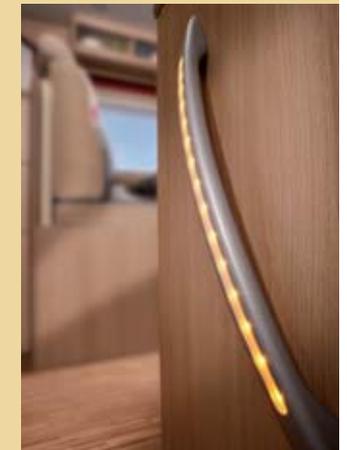

TravelLounge: Comfortable – three-stage reclining backrest. Luxury when on the road, having dinner or simply relaxing.

VarioSeat: In a matter of seconds the side bench can be converted into a forward-facing seat with three-point seatbelt.

Anti-allergenic mattress cover: Protection against allergies. Anti-allergenic mattress covers for all fixed beds are standard features in all motorhomes. Sweet dreams!

Step inside: The handrail lights the way.

Comfort-Class

10

All-round talent for every situation

Colourful ice-cream shops, chic boutiques and picturesque cafés with this inimitable, delectable aroma of freshly roasted espresso beans streaming out of them: That's just the way you imagined the old town would be.

And it was just a few hours ago that you decided to make this short weekend trip. A spontaneous decision, and one that your Bürstner City Car can accommodate with ease. After all, it's ready to hit the road at any time because, in spite of being used in everyday road traffic, everything you need is on board.

The advantages of this motorhome also serve you well during a sight-seeing tour: Mastering the narrow alleys in your City Car is a breeze. Thanks to its compact size (5.99 m x 2.08 m), it can squeeze through practically anywhere.

With the City Car, Bürstner presents a panel van to you for the first time. It's a true all-round talent with all of Bürstner's virtues and, at the same time, it can easily be used on a daily basis.

And at the same time it is equipped with everything that gives you the feeling of being at home while on the road. Whether travelling as a couple or alone – the City Car is your motorhome for all occasions.

City Car

11

Small but ... wow

Whether for holidays or just recreational fun, this comprehensively equipped motorhome is good for just about any occasion. Thanks to the swivel pilot seats, the seating area converts to a comfortable living room for four persons. The table top can be adjusted to a different size by means of a folding mechanism. If you'd like to use the table outdoors, then there's a corresponding mount located on the exterior wall of the kitchen.

The functional kitchen will win you over with clever details: a 97-litre refrigerator, a 2-burner hob, an integrated stainless steel sink, overhead and base cabinets, as well as a retractable worktop.

At the rear, two lateral bed units, suitable as a sitting area during the day, can be converted into a cosy 1.5-metre double bed in a matter of seconds. And even with the mattress folded down, the space beneath it can still be used to store suitcases, sports gear, food supplies and much more. In addition, the ample storage cabinets make the City Car a true wonder in terms of space.

The complete interior is designed in light maple portofino. The sophisticated lighting system also ensures that there is always a sunny atmosphere in the City Car.

Easy loading: The huge storage space in the rear is not only easily accessible via the large doors, it also offers sufficient space for bulky sports gear. The window screens and blackout blinds mounted on the door windows are also very practical.

A true wonder in terms of space: A nifty folding door separates the bathroom from the living area. There's sufficient space to take a shower and store utensils.

You can rest assured: Numerous lashing eyes ensure safe transport.

Ingenious: A bench seat and storage space in one.

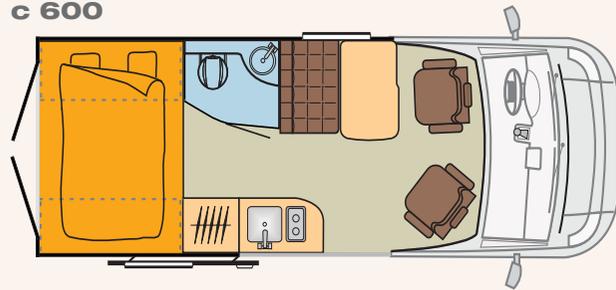

Deposit space: Things can even be discreetly stored in the floor under the table in a storage compartment.

Panel van: Pour without having to get up. Just reach under the bench seat and there you have it: more drinks.

VANomenal down to the last detail

Can you still recall your first holiday in your own car? Let's just get away, that was the motto back then. Trying out your language skills, getting to know a country and its people, being free. Sleeping on the beach, counting the stars, all that was part of it.

And today? The beach, the people, the stars: Actually, it's all still the same. Only: You can arrive much more relaxed and in greater comfort. Because now you're driving about in a Bürstner Travel Van. In the Travel Van, you can feel the comfort in every detail. Allow your sense of spontaneity to have a bit of space.

The Travel Van is as compact and versatile as a normal car, and yet it is also incredibly comfortable. Wherever your sense of adventure takes you: With the Travel Van and its elegant, aerodynamic design, the greatest pleasure can be had anywhere.

The swivel pilot seats provide pure relaxation during long trips, and the shape of the furniture in pear wood finish makes it a real eye-catcher. From culture to nature – with the Travel Van you'll experience well-being everywhere you go on your time off.

Enjoy the lovely side of life and experience how lively memories can be.

Travel Van

15

You're right on target with your dreams

Anyone who experiences a lot also needs to take a break. And you can enjoy it in the Travel Van whenever you feel like it. The cosy seating area invites you to do exactly that. The side bench with adjustable neck support is integrated perfectly, thanks to the extendible tabletop – the same applies to the swivel pilot seats.

Another option is a relaxing nap. The large single beds with comfortable pocket-spring mattresses that come with the t 620 G encourage you to dream and relax. Practical work surfaces, spacious nightstands, and cabinets and drawers located under the bed ensure that everything is within reach.

The kitchen comes across as functional, right down to the last detail. The 3-burner hob converts into a large work surface thanks to the glass cover, and by covering the sink you have a practical chopping board. Directly within reach are a 93-litre refrigerator, storage cabinets with electrical sockets and roller-mounted drawers. As a result, cooking is also fun while on holidays.

Comfort for three: The seating area is easily made into a comfortable bed.

This is how it works with the space: If you fold up the spacious double bed in the rear, then you'll have easy access to the rear garage and the linen cupboard on the left or the wardrobe on the right (t 570 G). Pretty clever.

Give it a spin: When you want to take a shower, just slide the pivoting basin to the side and just like that you'll have plenty of room to move around.

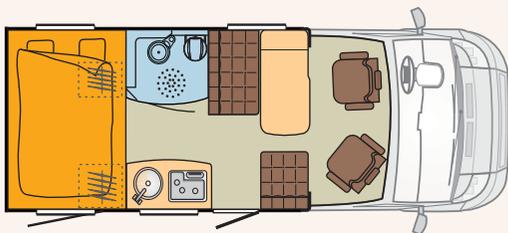

And then there was light: The skylight offers good lighting conditions and fresh air for the area around the seating area (optional).

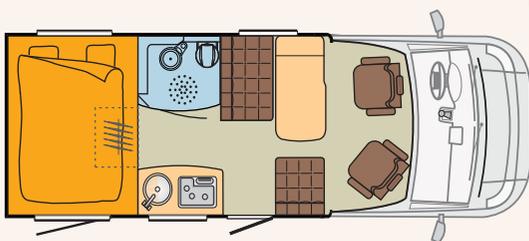

All clear in the rear: It's entirely up to you how you choose to use the voluminous space in the rear garage. For your bikes, your motor scooter or a substantial amount of holiday luggage.

We bet we can help you out with your favourite hobbies!

Quickly pack up your things and off you go to your special feel-good spots. Pursue your favourite hobbies or even try out something new. Anything's possible! Because the Bürstner Prismo turns your wishes into reality. Have you always wanted to hook up and tow a motorcycle trailer or transport your boat to the nearest harbour? Not a problem with the Bürstner Prismo. With its top towing capacity of as much as two tonnes, it can easily tow just about anything.

And if the Prismo's unique dynamics impress you, you'll also be impressed with its exclusive and premium design: exterior as well as interior. Everything has been well thought out down to the smallest detail. The large rear bed offers sufficient resting space, and the new

generation of the compact VarioBad bathroom allows you to revive yourself by freshening up.

Right away you'll feel just like new. Don't let any opportunity pass you by. At the drop of a hat, live out any dream that passes through your head. The new Prismo is ready and waiting.

Prismo

19

Independence at a high level

The Prismo has stylish, sporty contours both inside and out. Shapes and colours are perfectly coordinated with one another. The interior, in a maple portofino finish, is both friendly and trendy. It harmonises perfectly with the 16 possible design schemes and with the cosy flooring in a modern wood-strip look.

The Prismo is also well equipped for rest periods. The rear bed pampers you with a rubber-supported slatted bed frame and a

high-quality pocket-spring mattress. There's sufficient space for your linens and clothes in the storage cabinets above the bed and in the wardrobe beneath it.

The spacious rear garage can be accessed from inside the vehicle as well as from outside via the large garage hatch.

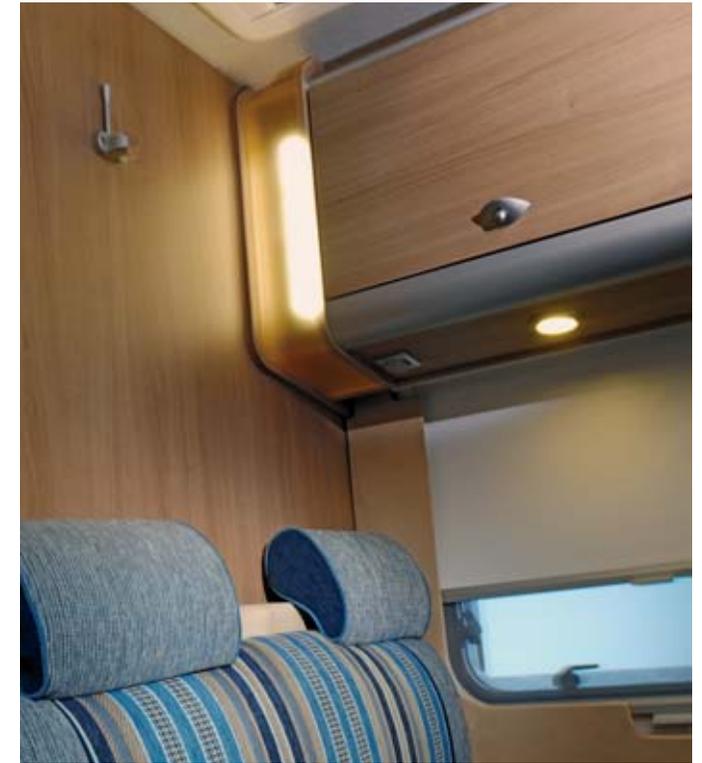

The kitchen gives the interior an elegant appearance with its light tones and the refrigerator in a monolithic look. The half-dinette converts into a large round space thanks to the swivel pilot seats, the side bench and the table extension. The standard sky roof presents everything (and everyone) in a good light.

Space travel: Thanks to the huge rear garage underneath the spacious bed, the carrying capacity for your hobby gear is practically limitless.

Trailblazer: Optimal access and space when it comes to taking a shower – the basin swings to the side, and the faucet can be used as a showerhead.

Light effect: A prime example of the Prismo's exclusive design quality: the additional light fixtures in the overhead cabinet.

Dynamic duo: Twin tyres and rear-wheel-drive for greater driving safety, traction and towing capacity.

Clear signals: Rear lights that are very visible.

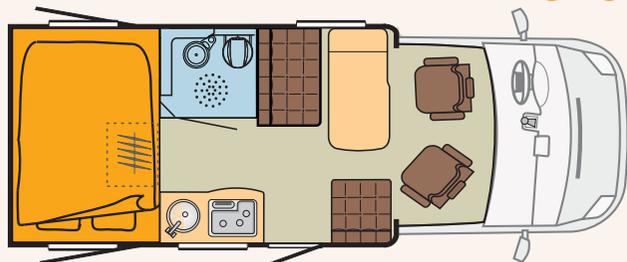

Subtle design: The roofline's aerodynamic shape reflects the fun you'll have while driving the Prismo.

Comfortable: The electronically operated step offers help when entering and exiting (optional).

The new feel-good time – anytime

Holidays! That's the time to relax and think about yourself for a while. Let nature and the surroundings work their magic. Whether it's a sea breeze or the unusually fragrant aroma of the pine forest you just passed by. Just breathe deeply and indulge in the wonderfully warm sunlight, taking a break from everyday life.

The Nexxo is the ideal partner for that. It helps you to forget the mundane and at the same time experience something new. And it happens with such natural ease that you'll be amazed. Everything is in its place. Just as if you had designed the Nexxo yourself.

Thanks to its flexibility, which offers you everything you would wish for while travelling, you can focus on what's even more important than the destination: the road. That way, even longer distances can be reached without any difficulties. The Nexxo satisfies the most discriminating demands, both in terms of design as well as equipment. Turn every outing into a mobile experience. Any time you like, take some feel-good time just for yourself – and the Nexxo.

Nexxo

23

Freedom as you like it

Openness and flexibility – characteristic features of the Nexxo. You can change worlds easily and comfortably: between the living area and the driver's cab. Just turn the front two seats around for shared meals. The tabletop can be extended and the large bench can also be incorporated. That way, a spacious, comfortable living area is created that makes a completely harmonious impression, with the furniture in pear wood finish and the tasteful upholstery design scheme.

The stylish L-shaped kitchen with a separate refrigerator (t 660) radiates spaciousness: a 3-burner hob that can be covered, a wide draining board, a sink with a cover that can also be used as a chopping board and, not to mention, lots of drawers and cabinets. Every good cook also needs a good refrigerator: 104-litre capacity, 10.5 litres of which is freezer space, comes standard with the Nexxo. There's also sufficient space for clothing: shirts, blouses or towels all have their own place in the tall linen cabinet.

Wet room: The shower in the t 610 and t 660 models is a separate space. The intelligent partition-wall system is an example of perfect utilisation of space.

Refreshing: The t 620 G comes with the compact VarioBad with the pivoting basin. For more freedom of movement while enjoying a shower.

Better viewing: The elegant flatscreen (optional) can be pulled out and turned in any direction you like.

Storage space: A lot of space for your bikes and everything you need to take along. There's sufficient space and, if you desire, you can access the space from both sides.

Fine design/fine woods: Various shades of wood provide a cosy atmosphere (optional).

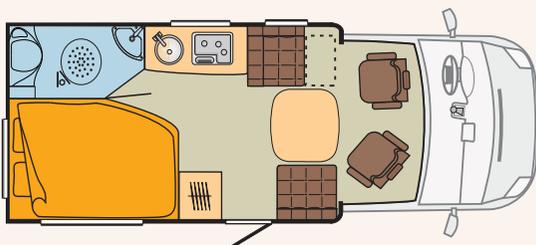

Be seen: and see better.

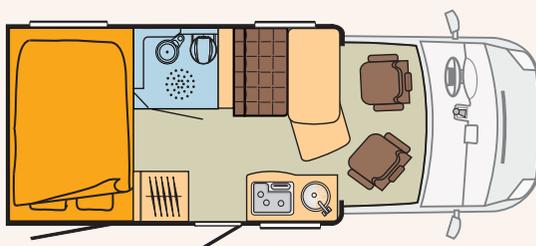

Perfect entrance: The solid step helps you to enter the Nexxo at any time of the day or night.

Just the way you like it

A deep-blue sky, luscious green along the edge of the path, the twittering of birds in the wind – impressions of a lovely day while on holidays. When you're travelling, everything just feels nicer. At what other time is life so relaxing, so varied and so colourful. Arrange things so that your time will be pleasant and comfortable – the Marano offers you an endless range of options.

You're rolling down the road gently and elegantly. Unforgettable moments lie behind you and fascinating experiences are ahead of you. Just keep driving in the direction of the horizon, where nothing can disturb your view, and enjoy the feeling of unlimited freedom.

Choose amongst three different floor plans and 16 different textile design schemes – just the way you like it, exactly what makes you feel good. At times, you'll have the feeling that you've already arrived, even before you've even set out. No matter what your destination may be, in the Marano you will arrive in a relaxed state.

Marano

A new sense of space

An invitation to feel good: That's the first impression you'll have of the Marano – and every subsequent one, too. Its spacious interior in a friendly elm finish radiates sympathy and a joy of life. The inclusion of the comfortable pilot seats in the seating area underscores the generous amount of space available.

The tabletop with its practical telescopic leg can easily be moved to one side. That way, you can comfortably make your way to the driver's cab. The Marano is approved for three persons thanks to the VarioSeat on the nearside. The side bench can quickly be converted into a seat with a three-point seatbelt.

The Marano's second seating group option will impress you with its half-dinette with a side bench and a table with a rotating extension.

The curved L-shape kitchen offers all the modern comforts: an efficient 3-burner hob that can be covered, a practical draining board and a nicely shaped sink with a cover that can also be used as a chopping board. Added to that are roller-mounted, easy-glide drawers – and, of course, an efficient refrigerator with a minimum capacity of 104 litres that comes as a standard feature.

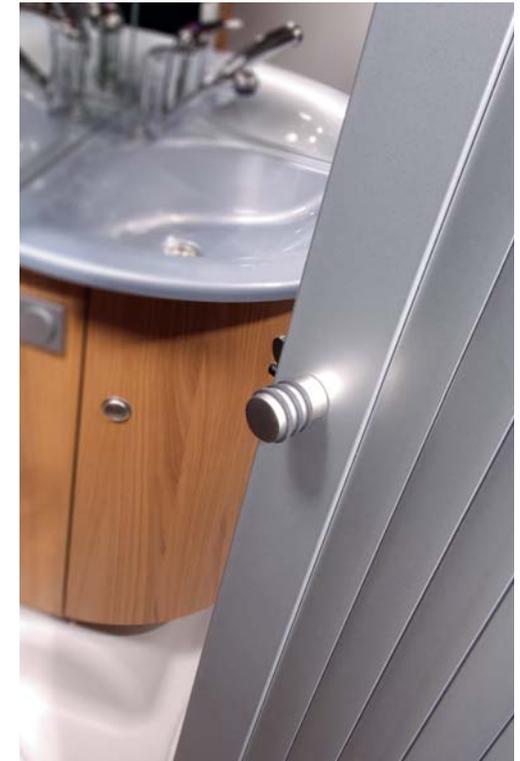

Innovative VarioSeat: In no time the side bench can be converted into a forward-facing seat with a three-point seatbelt.

Always within reach: From the rear bed or the bathroom -- your clothes are always close at hand. So what's on today?

Fine: The bathroom delivers what the first glance promises.

Ample space: The Marano reveals its largesse beneath the spacious double bed in the rear. Space for all the essentials, everything else, and still there's more room.

Filled up: Two 11-kg gas canisters are sufficient even for marathon trips. You can easily access and load the storage compartment on the side thanks to the low edge.

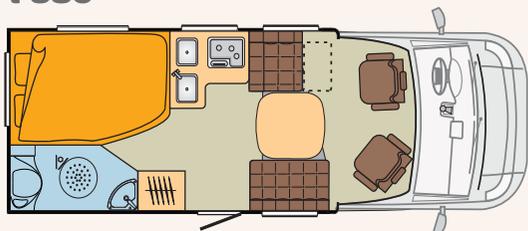

Everything fresh: in the 104-litre refrigerator, including freezer compartment.

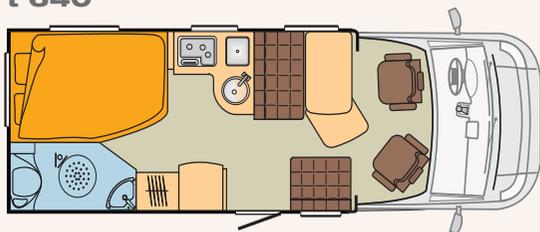

Bright spots: with the MultiLux spot lamps – right where you want them, pivoting.

A true paradise, that's what they're saying

The loveliest moments while on holidays are the nice surprises. It could be a next-door camper's friendly invitation to dinner, a rare display of nature or discovering new landscapes. If you're open to serendipitous moments, then you'll be rewarded countless times along the way.

Reward yourself with the Solano's comfort and cosiness: elegant and classy on the outside, homely and comfortable on the inside. With a fascinating mix of materials and a generous sense of space that brings in the expanse of the sea.

The Solano has a lot of positive surprises in store for you. With good reason, it is one of the most successful low-profile motorhomes in Europe. And it radiates this confidence in every environment. The Solano's feel-good factor is enormous. You'll feel it from the very first moment, and in many cases you'll still feel it after your holidays are long over. No matter where you are, it will feel like you're in paradise – or in a Solano.

Solano

31

Your wishes become reality

Regardless of the number of destinations you'd still like to discover, the Solano will satisfy just as many wishes in terms of quality, comfort, cosiness and a sense of space. A prime example for that is the large L-shaped seating area. It offers enough space regardless of whether you're sitting alone, as a couple or even a cosy group of five, if you like.

The upholstery is agreeably taut and also features a thigh rest in front – that way, your legs will have the best possible support.

The upholstered back is high enough so that you can lean back comfortably and fully relax. The padding in the upper area offers additional support for the head and neck.

The seating area's sweeping design is mirrored in the rounded edges of the kitchen furnishings and the fine, monolithic look of the refrigerator. The roller-mounted, easy-glide drawers with telescopic runners and the illuminated step are the icing on the cake in terms of the stylish and perfectly coordinated ensemble.

You're not dreaming, you're on holiday

Don't be surprised if, in spite of the perfect weather, you prefer to stay in the Solano and enjoy the interior's „sights“.

The elegant walnut furnishings with fine wenge inlaid strips and aluminium profiles as well as the ergonomically shaped handles with push-button fasteners round out the aesthetics of the Solano. The Solano offers you the highest level of sleeping comfort and the layout of the bed that you like best.

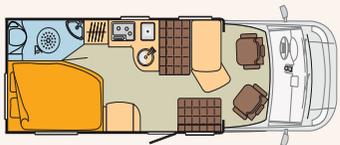

Especially interesting: the free-standing bed with a slatted frame that can be moved and positioned – here's the sleeping situation (additional images available on p. 57). As a result, you can use the room in an ideal way at any time.

Freshening up is fun in the bathroom with the round shower that can be screened off as well as indirect lighting. In the rear garage, which can be accessed from both sides (optional), you can easily store a considerable amount of holiday equipment.

Perfect foursome – even for a twosome

Are you sometimes amazed by nature? The way sunflowers turn to face the sun? The way chameleons change colours? The way some insects can camouflage themselves so well that it's hard to recognise them with the naked eye? It's admirable how creatures all over the world adjust themselves so perfectly to their environment. In the case of the Ixeo, the opposite is true.

The Ixeo adapts itself perfectly to your needs. As a low-profile, it falls somewhere between an alcove and an integrated motorhome. Consequently, it embodies an entirely new and revolutionary concept.

With two large double beds – one of which is designed as a fold-down bed – it satisfies all of the needs of a couple with friends or family. It's suitable for anyone who prefers the driving comfort and the exterior design of a low-profile yet doesn't want to forego the spacious sleeping comfort of an alcove or integrated motorhome.

The Ixeo is a pioneer among the latest generation of motorhomes. And in spite of its compact exterior dimensions, it's ahead of its time by more than a car's length. Be a trendsetter – in the Ixeo.

Ixeo

35

Venturing down new paths

More room, more cosiness and more comfort: Those are the advantages of the new Ixeo. It's impressibly noticeable in the spacious living area, perfectly complemented by the large seating area and the pilot seats. You'll enjoy a freedom of movement there that's normally reserved for larger, more luxurious models.

All that is made possible by the innovative concept of the fold-down bed, which is integrated above and across the seating group and can easily be folded down or folded up. The large surface area in combination with a cold foam mattress and slatted frame ensure maximum sleeping comfort. A pull-out step in the kitchen unit helps you to climb up and into the fold-down bed. It can also be folded back and used as a drawer.

The cosy double bed in the rear also offers sleeping space for two more. A lot of daylight entering through a large window provides a constantly friendly atmosphere there. The storage cabinets offer additional room for luggage. Climbing into the bed is very easy and comfortable (it 674 G). The two steps are also equipped with modern LED lamps. That way, you'll always find the right footing.

Innovations for moving moments

The Ixeo will win you over with its clever planning. For instance, the flexible dining table can be extended. Storage cabinets beneath the fold-down bed provide welcome space, and recessed spotlights create pleasant light conditions in the living area.

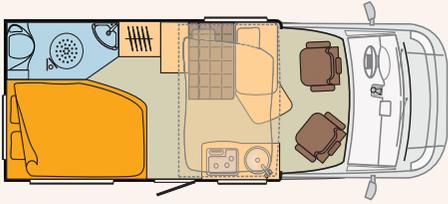

A lot of ideas also went into the comfortable L-shaped kitchen. The hob and sink can be covered separately, creating large work surfaces that can be extended further using the practical draining board.

The lower bunk bed in the it 666 can be folded up. That way, the rear garage is enlarged. And even in the bathroom there's no need to sacrifice anything. The hand-rail lights the way.

Tailor-made for boys,
girls, mum and dad

School's out! Day care's closed! Annual holiday! Get away quickly and place some distance between you and your everyday life. And then the question arises, where to? – your daughter wants to go to the coast, your son wants to head into the mountains. With the Nexxo Family you can accommodate everyone. And at the same time preserve peace within the family.

With its clever design, this Bürstner offers a lot of room and freedom for a restful and relaxing holiday, for three, four or even six.

The Nexxo Family is definitely attuned to the special needs of families. With a sufficient number of comfortable seats and enough storage

space for everything you have to take along: from your son's mountain bike to your young daughter's beloved doll's pram.

And the intelligent interior design also creates retreat options for the parents. If you decide in favour of the Nexxo Family then everyone will have the holiday he was hoping for. The kids can play and run riot, mum and dad can sit back and relax.

Nexxo Family

39

An adventurous spirit runs in the family

For many families, holidays together are the nicest time of the year. The best ones are when everything seems to fall into place. Starting with sufficient room to move about in the living area, plus the spacious kitchen and finally the comfortable beds. In every instance it becomes clear just how perfectly the Nexxo Family is tailored to the specific needs of families.

The spacious seating area offers enough space for four persons or more, depending on the floor plan. Comfortable pilot seats for the driver and front passenger swivel easily (depending on the floor plan),

allowing you to dine at the large table or enjoy an evening of games. Above it all hovers the large double bed designed as a fold-down alcove bed. Consequently, there's maximum freedom of movement in the interior space.

The comfortable kitchen is equipped with everything you need to indulge the eye and palate. The 3-burner hob with a glass cover and the large sink leave no wish unanswered. Crockery, cutlery and all ingredients can be stored in solid drawers mounted on metal rollers.

Twin pack: The A 694 and A 698 G models are equipped with rear-wheel-drive and twin tyres. Towing capacity: as much as 2,000 kg.

On the road with everyone and everything dear to you

In every respect, the Nexxo Family addresses the wishes and needs of each individual family member. You can snuggle up in the large seating area with comfortable and pleasant cushions. There's even enough space so that when eating or playing no one's in the way.

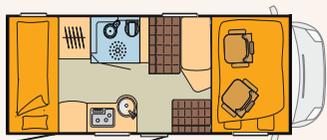

And everywhere there are generous storage spaces for the entire family.

The small ones enjoy climbing into their comfy bunk beds, each one with its own window (depending on the floor plan). The perfect thing for curious young eyes. All in all: a lot of open space for nice dreams, for the younger and the older ones.

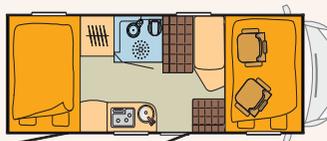

If you need more space, simply fold up the bunk bed and you'll find enormous storage space in the garage. And the large bathroom invites you to freshen up.

The jumbo for all occasions – from deep sea to deep snow

To the North Cape and back. Or, rather, four weeks of wintertime fun in the Alps. Scout out unfamiliar cross-country ski tracks, try out new ski runs. Holidays at the peak of winter fun – with everything that enhances one's enjoyment when the temperature drops. In the Argos, you're equipped in the best possible way for every climate and every distance.

Just set the cruise control (standard feature) and off you go to new destinations. At some point you'll take off your wristwatch and focus only on the rhythm of nature. Wake up with the sun. Go to bed with the moon. Feel good with the Argos.

People on the road for a longer period of time know how to appreciate the amenities of space. And the Argos has a lot to offer in that respect. For as many as seven people.

Even the flexibility of the Argos will amaze you. A heated double-layer floor also protects your cargo and all of the installation lines against the cold outside temperatures. The Argos can accommodate your diving gear as well as your ski equipment. No matter where you are – with the Argos anything's possible.

Argos

Free yourself from all constraints

Independence, tranquillity and unlimited comfort – that's what the Argos delivers. For instance, with the gigantic Reliner seating group with novalife® upholstery in the cosy „crushed“ look. The sitting position can be individually adjusted in a variety of settings. The elegant furniture in walnut finish and the variable lighting concept with many settings also set the standard in terms of comfort and cosiness.

The luxuriously equipped onboard kitchen with a 4-burner gas hob and baking oven/grill combination is also a star feature. The 150-litre refrigerator with integrated freezer compartment will keep a shopping-cart load of groceries fresh. So that you can also freshen yourself up in the best possible way, the „spatial bathroom“ concept converts the washroom area into a large bathroom with a dressing room and a separate shower. A private space, pure and simple.

Nice idea: For the sake of effective temperature control, the wooden sliding door separates the driver's cab from the living area, thus guaranteeing winter-ability.

Highlight: The glass cabinet provides the entry area with nice mood lighting.

Good connection: The onboard electronics, such as the temperature regulator and the electrical sockets, are – like everything in the Argos – within easy reach.

Better hindsight: The Argos not only has a smart design in terms of its shape; the video camera for reverse drive adds another functional plus.

Basement: Double-floor construction for ample storage options, easily accessible via a huge service hatch.

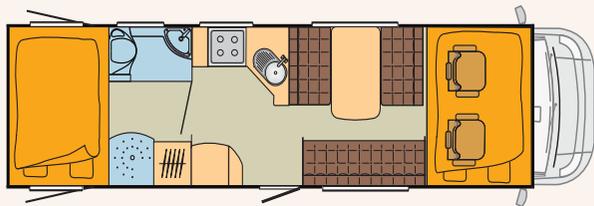

Clear-sighted: The alcove is aerodynamic, spacious and especially bright and friendly on the inside thanks to the natural light.

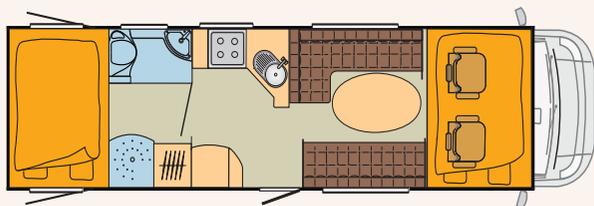

Side-long glances: The huge rear garage in the jumbo format is easily accessible because it can be entered without any problems from either side.

Love at first sight

If you're a connoisseur, our entry into the premier class of motorhomes will also give you a feeling of true delight. Just as a good French cheese is the crowning finale to a delicious meal, the Viseo is the icing on the cake when it comes to a relaxing trip down south.

Its huge panoramic windscreen allows you to take in unrestricted impressions of the houses, landscapes and people. Furthermore, the Viseo will impress you with its new shape and its attractive exterior design in white, or optionally with side skirting and bumpers in champagne or red (porto).

Another impressive feature is the Viseo's new wide-track chassis, which ensures a comfortable ride. You're equipped in the best-possible way with the anti-locking brake system (ABS) and traction-control system (ASR), both of which are standard features. Take the liberty of making your dreams and visions come true, with safety. Gain new perspectives time and again and see the world through different eyes. Enjoy your wanderlust – with the Viseo!

Viseo

47

High-calibre travel

If you want to see something of the world, the Viseo will open your eyes. Its huge panoramic windscreen hides nothing and reveals everything. The most attractive sights will wander past you while you enjoy the view with a laid-back attitude.

The new, cosy L-shaped seating area with a side bench offers lots of room. It is harmoniously complemented by the swivel pilot seats. In terms of the interior, your taste has free rein with 16 possible upholstery design schemes.

The comfortable fold-down bed with a high-quality cold foam mattress also adds a note of spaciousness and comfort. The special mechanism allows you to lower and raise the bed easily. Other highlights? Elegant light applications, a trendy two-colour visual look in the kitchen, a swivel TV mount, roomy wardrobes. There's a lot to discover in the new Viseo.

All of the advantages integrated into one

You'll recognise the new Viseo's level of maturity and sophistication in the many detailed solutions. The kitchen unit with light accents leaves nothing left to be desired. A 3-burner gas hob and the sink can be covered separately, providing you with large work surfaces. The lighting beneath the storage cabinets shows your ingredients in the best-possible light and the roller-mounted drawers ensure trouble-free cooking.

The 100-litre refrigerator with an integrated freezer compartment is located behind the finely curved monolithic front. It harmonises very well with the smooth fronts in elm finish, which bestow a clear, contemporary look to the interior space.

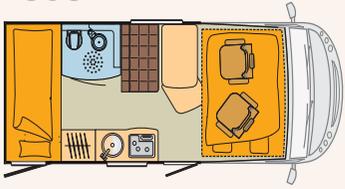

The VarioBed is more than just a place to sleep. It's a flexible component in the integrated space concept because it leaves no corner unused. During the day, the headboard is put up and the bed is moved next to the wall, creating a comfortable passage. In the evenings, the entire sleeping surface is available. Or, if someone wants to sleep while another reads, it's not a problem with the VarioBed. The same goes for tidying up, because beneath the bed is a huge and easily accessible storage space.

The design of the VarioBad is just as clever. When you want to shower, just swing the basin to the side.

The best opportunity to travel in style

Up and up: switchback after switchback. Left bend, right bend. And behind every curve, one breathtaking view after another.

The huge panoramic windscreen ensures you'll have a unique view of the fascinating landscape. No doubt about it. With the Aviano, it's not about arriving as soon as possible. Rather, it's all about arriving in a relaxed state and experiencing the maximum level of enjoyment when travelling.

The fastest route doesn't determine the itinerary – the loveliest route does. The one with the most beautiful views. The one that allows you to see things that you all too often overlook in your day-to-day life. Expand

your horizons. And enhance your freedom of movement. After all, the sense of space in the Aviano is also unique. The spot where the cab and the living area meld into one unit radiates a sense of vast space.

As an integrated model, the Aviano benefits from an optimal layout and variability. Five floor plans offer the right solution for every need – and 16 interior design schemes provide you with many options when it comes to choosing the interior design in synch with your personal taste.

The feeling of comfort and freedom of movement is unlimited. Take a front-row seat and enjoy the world of the integrated motorhome.

Aviano

51

Inspired far and wide

As far as the eye can see you will encounter cosiness and comfort in the Aviano. For many different and good reasons. One of the best ones, for instance, is the seating area, shown here in „Strada“ leather (optional). It combines all the benefits of natural material: a surface that's agreeable to the skin, easy to clean and the robustness of a durable leather.

Another highlight: the lighting concept. Ceiling lamps with additional LED elements in combination with the light rails beneath the storage cabinets create a special atmosphere.

Down to the last corner nothing is left to chance. Everything the co-pilot needs is stored to next to the passenger's seat in a large storage compartment with a roll-down shutter. The wraparound glazed front creates incredible views that you can enjoy from the comfortable pilot seats.

The VarioBad guarantees freedom of movement: You can swing the basin to the side into the shower area and the faucet converts into a hose with a showerhead. Ready, set, shower!

VarioBad

An abundance of possibilities

The table extension invites you to gather round, and the friendly kitchen fronts and roller-mounted drawers in light shades, as well as the chopping board in the drawer beneath the hob, invite you to execute your best cooking ideas.

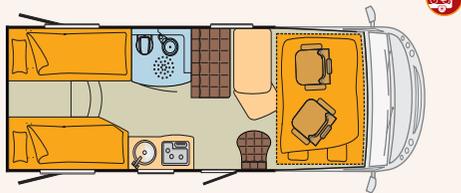

Depending on the floor plan, standard features include a 150-litre refrigerator with a separate freezer compartment and a door in a monolithic look. Also included are the rear-ventilated storage cabinets that provide a good indoor climate. Winter campers, in particular, will appreciate that. No wishes are left unanswered when it comes to

sleeping comfort. There's the fold-down bed in the front and, in the rear, you have your choice of placing the double bed across the back, lengthwise or in the middle. With the Aviano, a range of options is part of the programme.

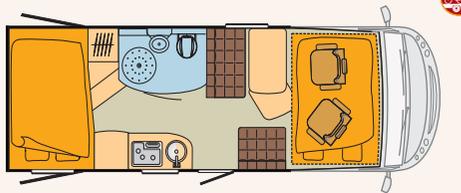

The solution for the single beds is also quite clever. If needed, they can be converted into a large sleeping area, and the spacious cabinets below offer a lot of room for your holiday wardrobe. And also under the freestanding double bed. The garage, which is easily accessible from both sides (optional), offers even more space.

Homely comfort

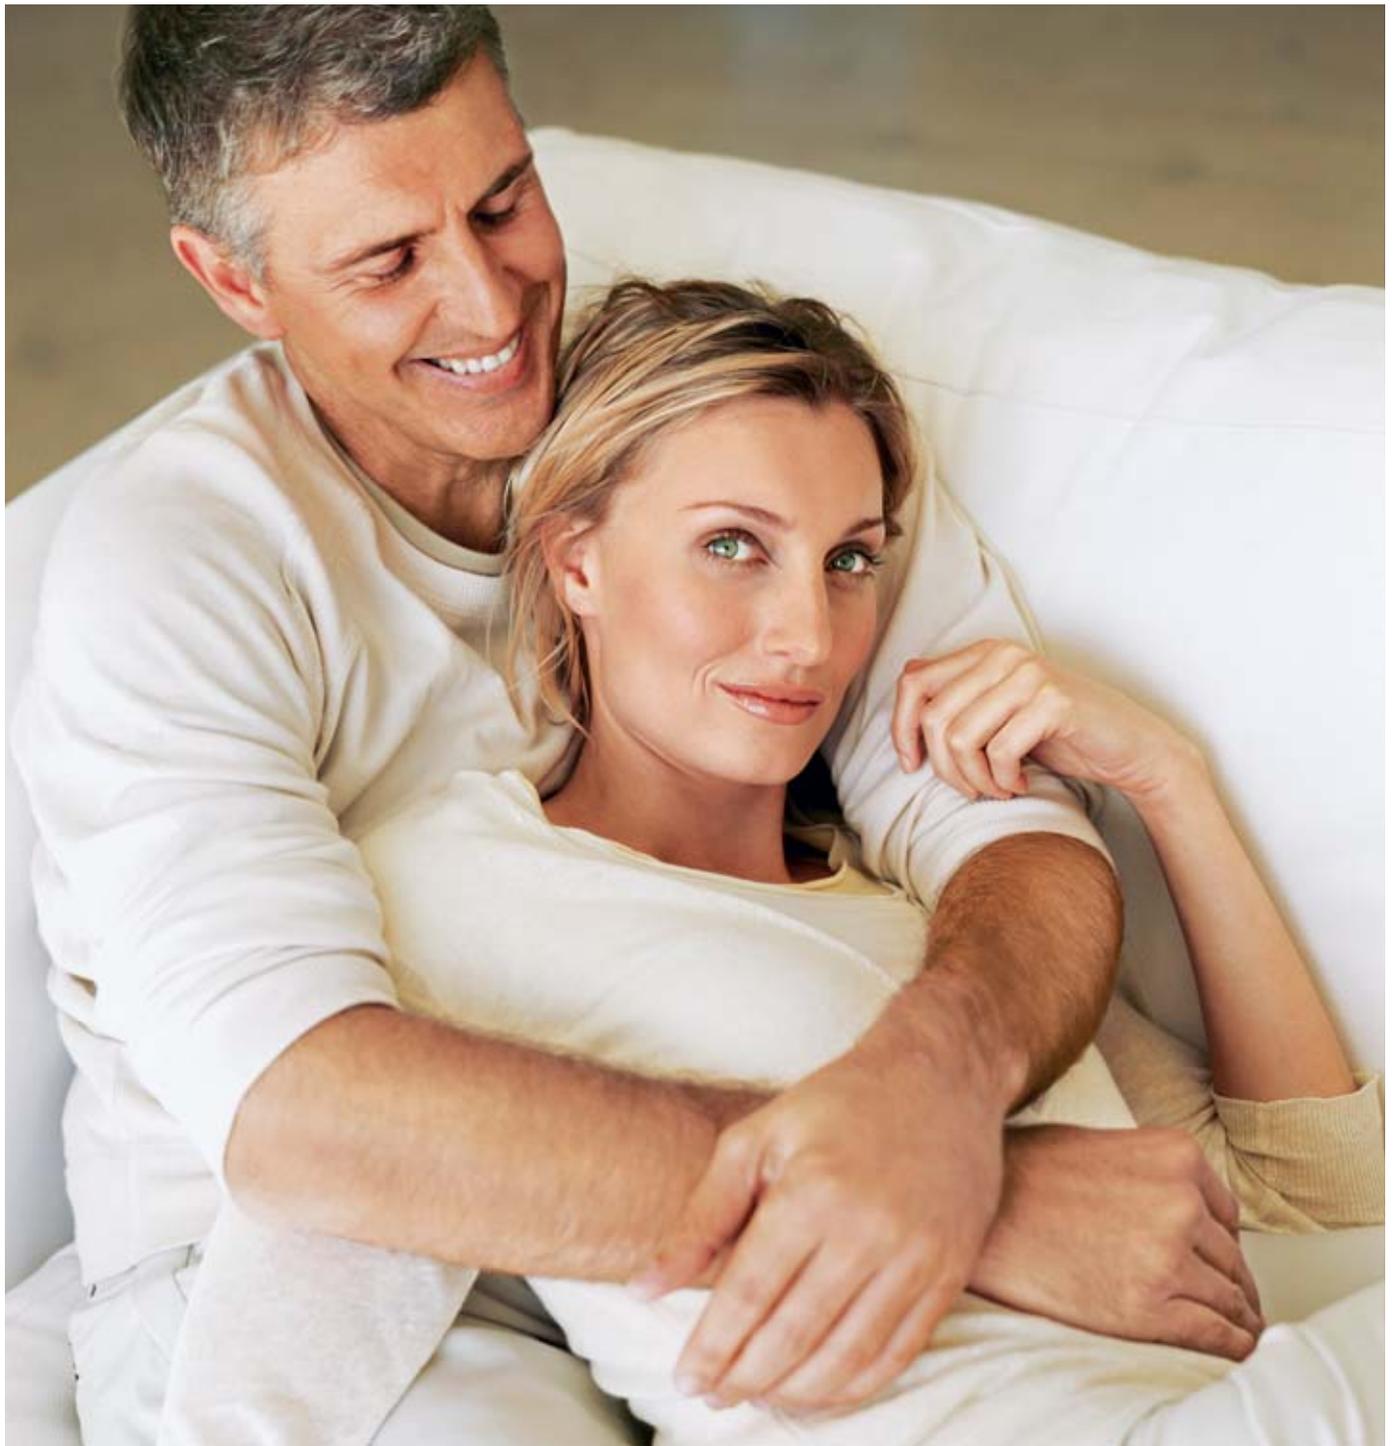

54

Give yourself a treat

Relaxing on holidays is all about spending time the way you want to. Of course, part of that is not being constantly on the go, from morning to night. Especially when it's raining or very hot outside. No matter the occasion, the main thing is that you want to relax within the four walls of your own Bürstner.

Take a deep breath. Let everything go. Those are the moments when your eyes pan across the interior space, which is immersed in the gentle glow of indirect lighting. Living, cooking, resting, freshening up – everything is set up in the best possible way. Enjoy the cosiness.

Quietly forget where you are at the moment. Home is where you feel a boundless sense of well-being: everywhere!

Reliner

Exclusive: The Reliner side bench can be adjusted to any level to meet your individual preferences. That's only available with Bürstner.

VarioSeat

Offering a lift: In a matter of seconds the side VarioSeat bench can be converted into a forward-facing seat with a three-point seatbelt. On request, an opposite seat is also available.

TravelLounge

An inclination: The backrests and the TravelLounge bench can be tilted, with three settings. You'll appreciate the comfort.

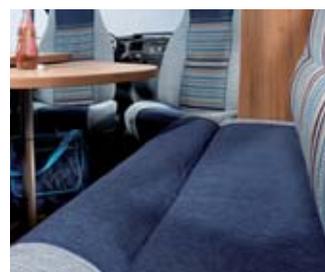

A cosy corner: The sumptuously upholstered L-shaped seating area provides a high degree of comfort. And a deep sleep when it's converted into a practical bed.

Suitable for long stretches: Whether you're eating, resting or driving, the height-adjustable pilot seats covered in the living area design scheme are truly comfortable and ergonomically designed.

Neck support: After a day of gazing and gaping, being able to kick back and rest your head is a pure delight (the neck support is adjustable).

A restful position: Substantial support for the thighs means that you can sit back and truly relax.

Sleeping comfort

56

An agreeable rest for an agreeable time

Holidays are filled with events. Every day you witness new things, gain new insights, always experiencing new and different things.

But rest and relaxation are also important when it comes to enjoyment without limits. The main time that occurs is when you're sleeping. Therefore, Bürstner models offer the highest level of sleeping comfort: from high-quality mattresses on flexible slatted frames to ample freedom of movement and, finally, a comfortable ambience that allows you to settle down and relax. All that together makes for a good night.

INNOVATION

Adjustable: not just the headrest. In a matter of seconds the bed becomes a cosy lounge.

INNOVATION

Heavenly bed: The fold-down bed, shown here in a low-profile motorhome, is simply folded up during the day and folded down again for a good night's sleep. You'll sleep like a baby here (depends on the motorhome model range).

Lying in wait: Single beds that come standard with pocket-spring mattresses and flexible slatted frames.

Freestanding: Double bed with a bookshelf at the head of the bed and a small nightstand.

Child's paradise: Kids love bunk beds, and they also free up space.

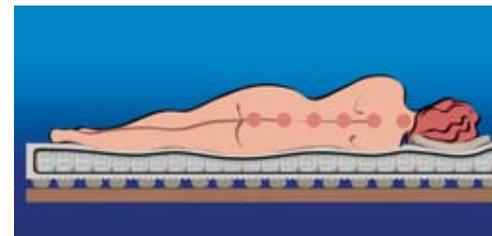

Delectable treat: Outstanding sleeping comfort in the alcove above the cab.

Togetherness: Spacious double bed for night-time freedom of movement.

Well-concocted: Placed crossways, the rear bed saves a lot of space.

Got your back covered: Bürstner only uses high-quality mattresses (pocket-spring or cold foam) that absorb the body's weight and adjust to the body's contour in an optimal way.

Pure relaxation: Special slatted frames with flexible rubber supports, along with the mattress, sustain your body. That way, you will find it easy to relax.

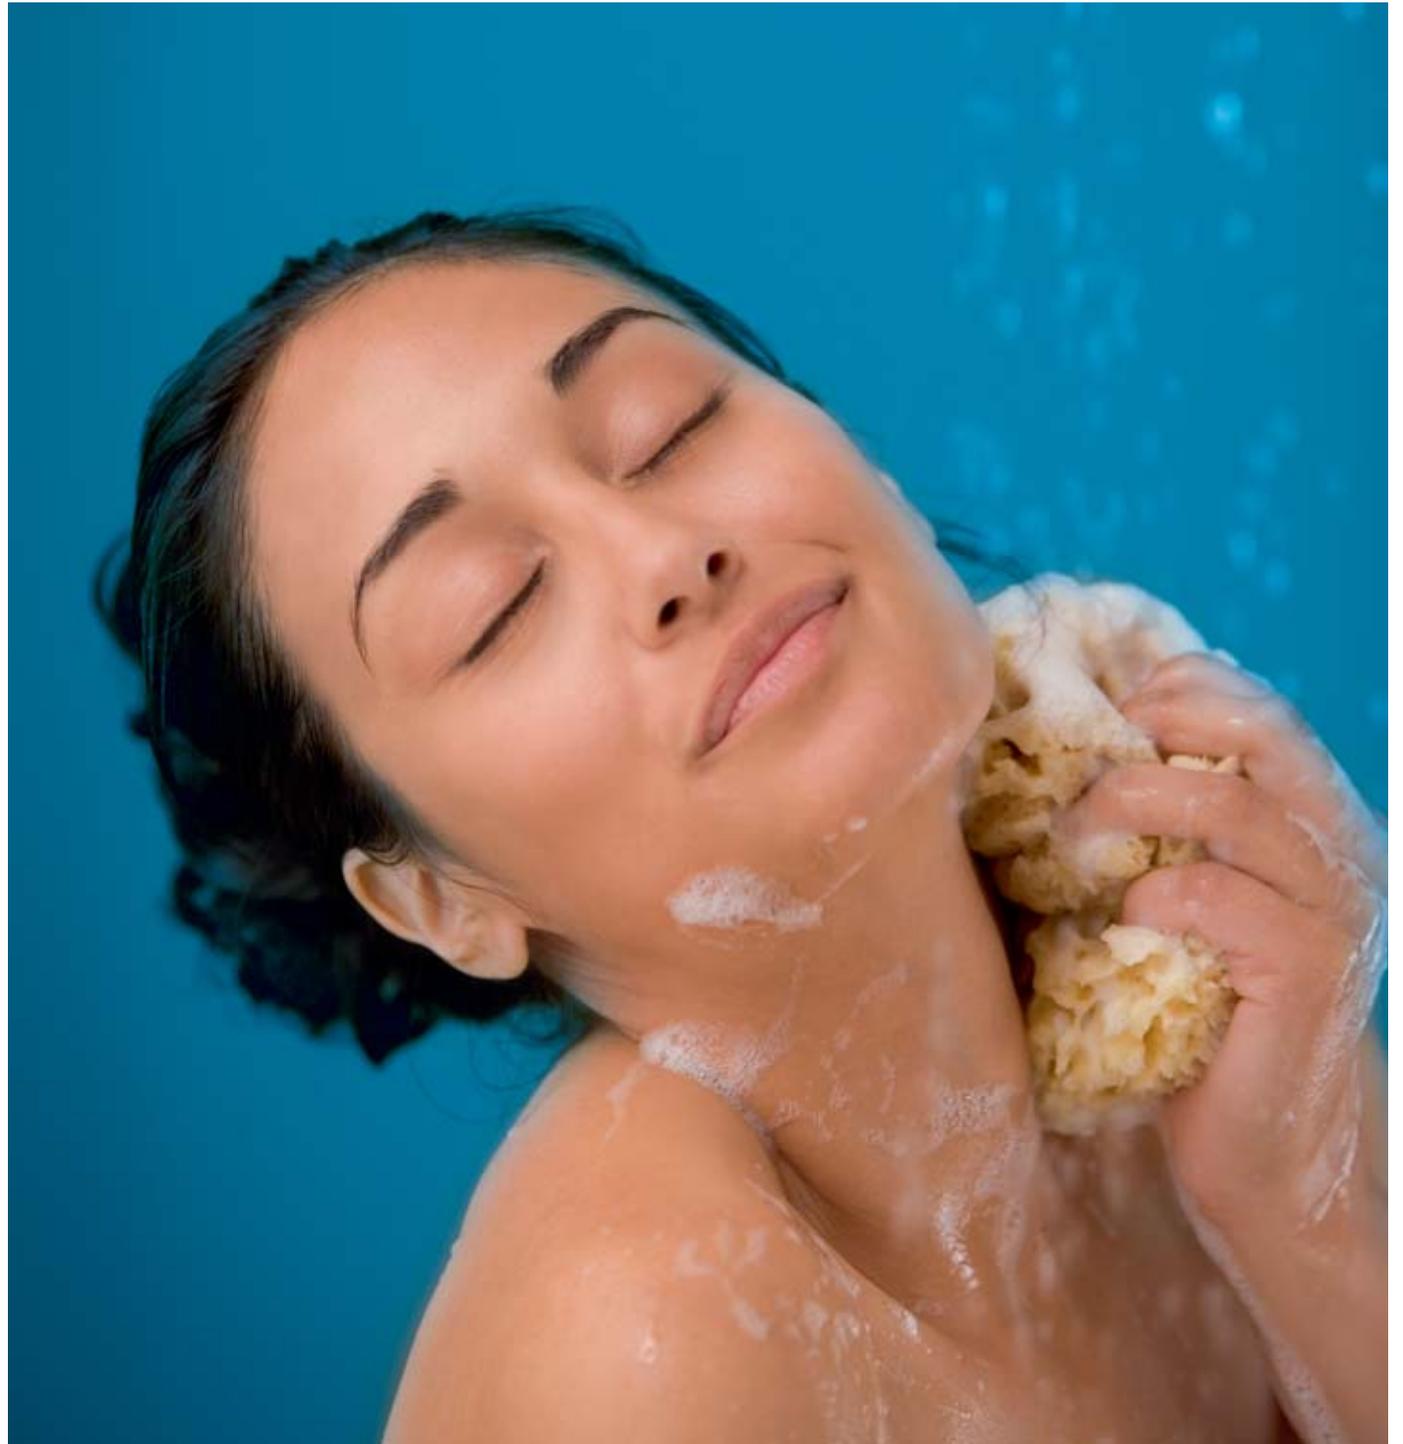

Bathroom comfort

58

Wellness for the soul

The nicest thing in the morning, after exercising or taking part in other recreational activities, is to freshen up in the bathroom. Warm water drips down and off your body. The shower gel gently nurtures your skin. Under the shower you simply rinse away all fatigue and exhaustion. And after that, you feel like a newborn again. The thing that provides you relief at home should also be available to you when on holidays.

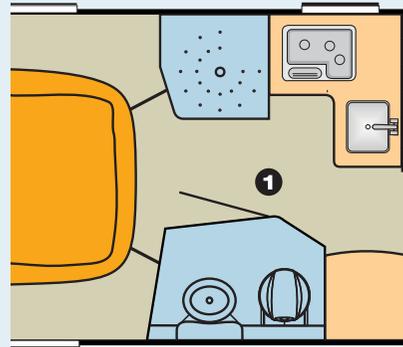

Thanks to the intelligent use of space, sufficient room is on hand. Clever detailed solutions provide for comfort with a bit of chic. Of course, there are plenty of spots to put things: your lotions, oils, creams, perfumes and cologne. There's no need to do without anything. Especially not that invigorating feeling of being clean.

RaumBad

1

Private space: Because the door to the toilet area (1) serves as a room divider, a spacious bathroom area is created complete with changing room and a separate shower. More private space as a result of a clever floor plan.

Nice details: Designer basins and faucets conjure up a dignified atmosphere.

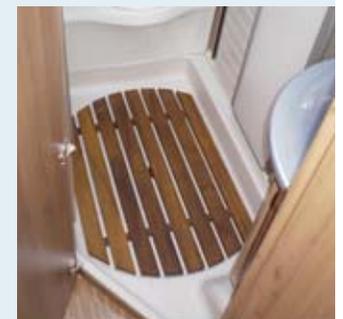

VarioBad

Trading places: To shower in comfort, simply slide the basin off to the side. And then you can use the faucet with its extendible hose as a showerhead. The wall that partitions off the rest of the bathroom is a folding wall, thus taking up a minimum of space. The backlit mirror is another nice feature.

One of a kind: A love of detail is attested to by the many high-quality appointments: for instance, the latest-generation fittings. Functional and aesthetic.

Protective measures: The slatted frame made of treated wood offers greater hygiene and stability.

The joy of cooking

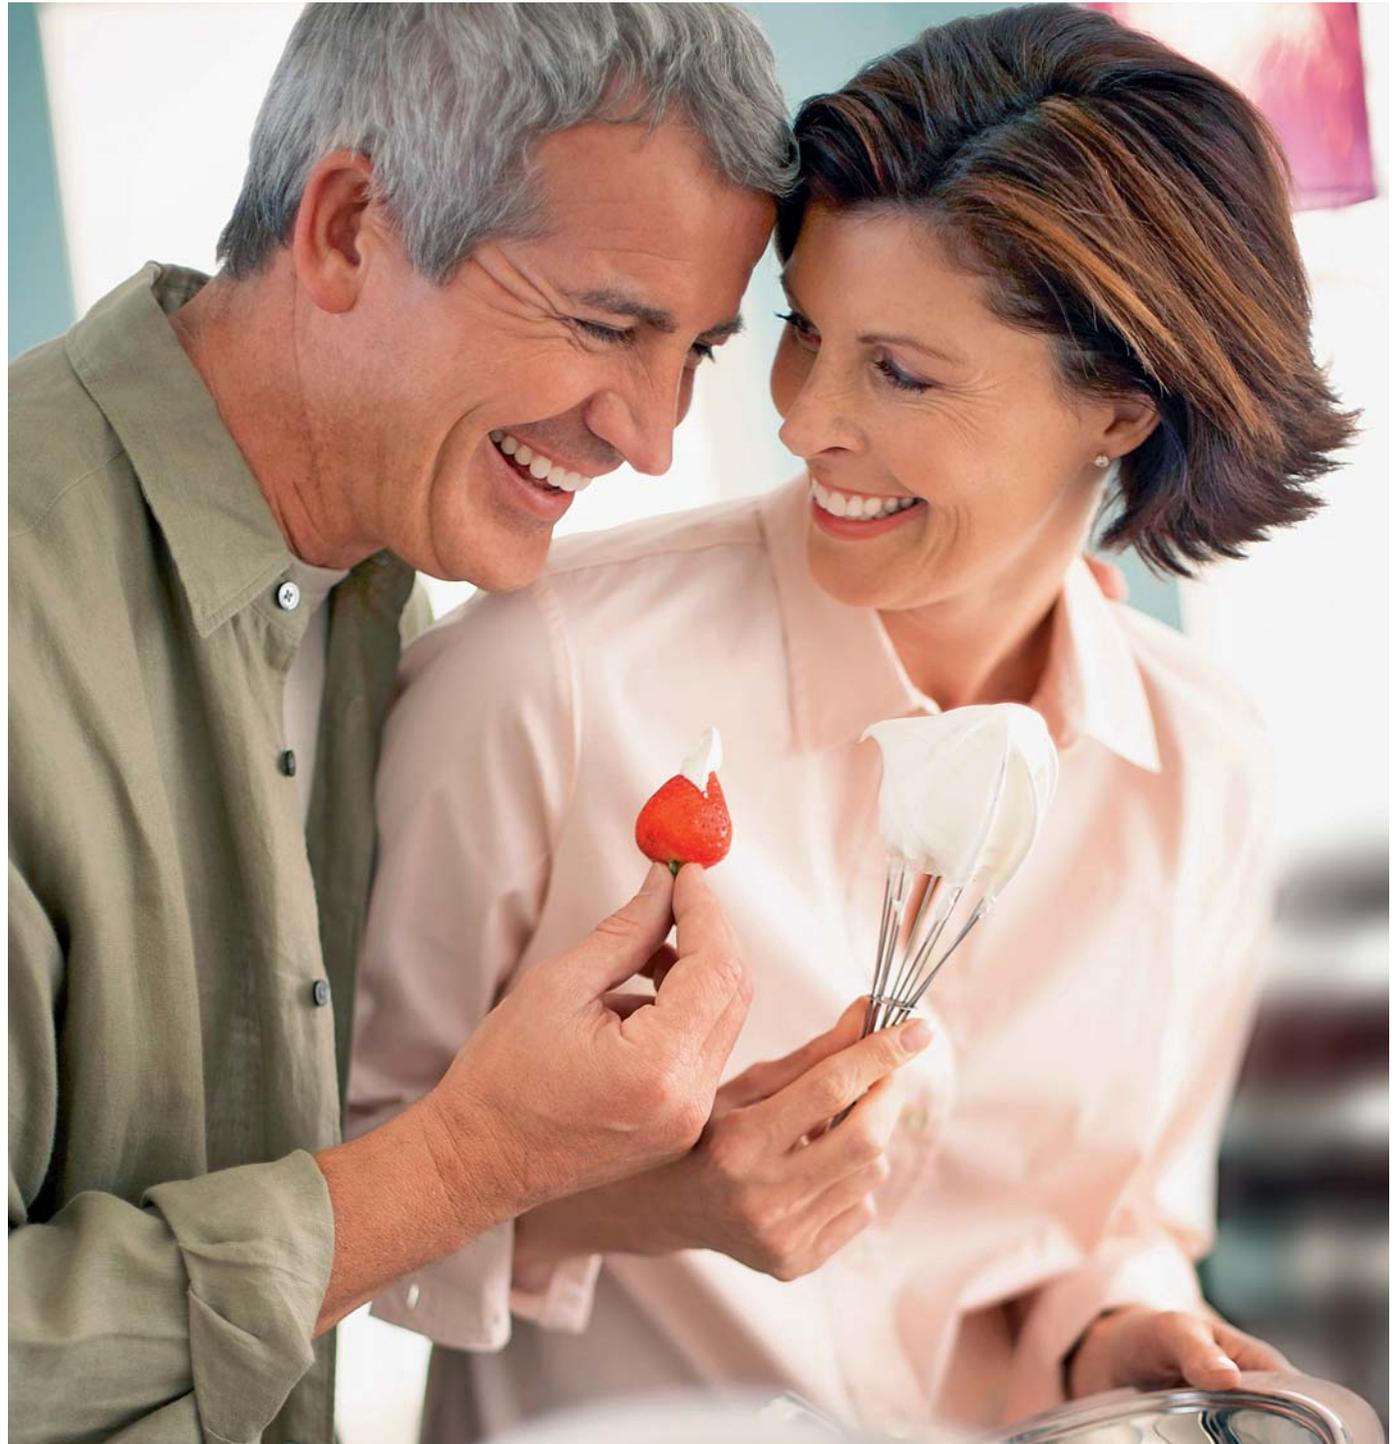

60

The best ingredients for your holidays

Fresh vegetables and aromatic herbs from the market, lemons right off the tree – the best ingredients are available locally. And in a Bürstner, you can make good use of them to your heart's content.

You'll find all of your utensils right where they should be. Within reach: Clever solutions and high-quality materials – every last corner is used to best effect. The Bürstner kitchens are designed so that no wish is left unanswered: large and robust working surfaces that are easy to clean. Flush-fitting hob-sink combinations. A refrigerator with just the right capacity, and much more.

After all, cooking on the road should be as much fun as the rest of your holiday experience. But if homesickness should ever set in: Whip up your favourite dish. Just like you would at home.

Pretty clever: Intelligent solutions mean that every inch of space is taken advantage of. From the right-angled L-shape kitchen unit with everything a master chef would wish for, to the roller-mounted, telescoping drawers, to waste separation. Clean and tidy! The chopping board integrated into the drawer beneath the work surface is a great kitchen aid (depends on the model).

Optimal use: Easy-glide, telescoping drawers ensure an optimal use of space, even the rear part of the drawers.

In hot demand: Even large pots will find plenty of space on the 4-burner hob. That should take care of those ravenous appetites. The icing on the cake in the mobile kitchen is the optional grill / oven, shown here as a component of the TEC tower.

High-tech chic: Behind the fine, curved monolithic front, the TEC tower contains a 150-litre refrigerator with a separate freezer compartment and an oven/grill combination.

Fabrics

Exclusivity in colours and shapes.

novalife® amber

novalife® blue

novalife® grigio

Easy to clean. Agreeable to the skin. Robust.

Red wine, crayons, chocolates ... thanks to novalife® there's no need to let any of that spoil your fun. If anything like that happens, all you need is a cloth and some fresh water and everything will look as it did before. novalife® is a revolutionary synthetic fibre which feels warm, soft and cuddly to the touch – yet is completely stain-resistant. Available as an option in all models except for the City Car. A standard feature with the Argos.

CARAVANING
DESIGN AWARD 2006/2007
INNOVATIONS FOR NEW MOBILITY

65

Strada (Leather)

Fascinating. New. High-quality.

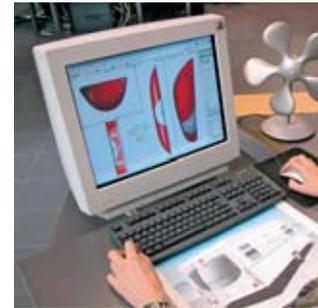

The new original long-life leather is a fascinating material that we offer under the name of „Strada“. It has an extremely pleasant feel and smell to it, and it invites you to settle in and cosy up. At the same time, it is robust, durable and easy to care for – all marks of distinction. A perfect all-round talent.

Classically elegant.

High-grade imitation leather is barely distinguishable from real leather in terms of its material properties. Constant development means that the fibres have been perfected to the extent that they are as comfortable, durable and pleasant to touch as the natural material. Bürstner only works with the best quality to satisfy the highest demands.

Toledo

Quality – the basis for unlimited well-being.

To have an all-round, good, relaxed feeling while travelling and seeking out new experiences, you need to have the assurance that everything has been taken care of and that you're protected against any unwelcome events. Only with that assurance in the back of your head can you calmly venture down new paths, get to know new cultures and gain new impressions.

Bürstner manufactures its products in state-of-the-art facilities with tried-and-tested production and development methods. Already during the planning stage, every Bürstner model is designed three-dimensionally on the computer and constructed with great attention to detail. This process allows

us to search further for better solutions, rather than merely being satisfied when standards are met. We keep going until every minor problem has been resolved in the best-possible manner by means of an innovative development.

Nothing at Bürstner is just standard; you always get something special. That also applies to our novalife® upholstery fabric, which won the Caravanning Design Award, as well as the unparalleled selection of many other high-quality and wear-resistant materials. We consistently meet our highest requirements, so that you may benefit from that and experience unlimited comfort and well-being in your Bürstner, everywhere and at all times.

Enduring and uncompromising

As a systematic means of quality assurance, selected models are chosen by us and subjected to rigorous testing. They are subjected to heavy strain on a specially prepared test track and soundly tested. That way, you will be able to enjoy your Bürstner for a long time, even after you've travelled many kilometres with it.

Perfect production

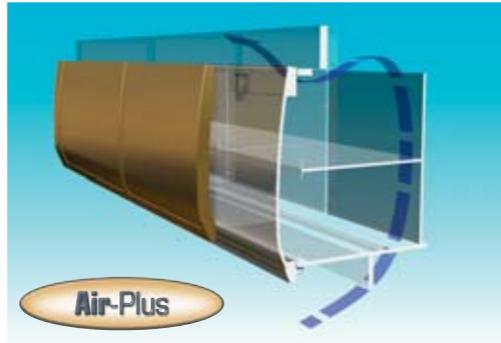

There's a crucial factor that guarantees the high quality of Bürstner products during every phase of the production process, from development, construction, furniture construction, assembly and stitching: The process is the perfect combination of

modern machinery and our employees' many years of know-how. All areas of operations are closely linked and certified according to the strict standards of ISO 9001. This efficient interplay between employees and production facilities makes it possible to produce, for instance, nearly 60,000 furniture parts of the highest quality each week in our own furniture production plant. In future, you can also continue to expect the same quality from Bürstner that you have grown accustomed to receiving from us. For that very reason, we are making farsighted and responsible investments, both in machinery and facilities as well as in the instruction and further training of our staff.

The know-how of tomorrow

Our greatest asset is the qualification and experience of our employees. We place a great deal of emphasis on offering young people sound training. That's the only way we are certain to maintain our qualified staff's high level over the long term.

Quality even at second glance: The rear ventilation of the storage cabinets means more comfort thanks to a better interior climate during all seasons of the year. The unrestricted flow of air in the interior space helps to alleviate dampness.

Quality, signed and sealed: Development, production, and sales are certified according to international standard ISO 9001:2000.

Standard features in this model series

Subject to differences in texture and colour in relation to the illustrated fixtures and fittings, insofar as they are in the nature of the materials used and are customary. The same applies to technical modifications to the vehicle, provided that the product quality overall remains equal or is improved, and use is not impaired. The water-supply system corresponds to the latest technology as of 10/2007 (Guideline 2002/72/EC).

Note: Special driving licences may be required to drive a motorhome!
