

TISCHER FREIZEITFAHRZEUGE

PICK-UP CABINS & TRAILERS

WELCOME TO TISCHER A SUCCESS STORY

TISCHER leisure vehicles have been part of my life and well-loved companions for our customers since 1973. The motor home cabins are products made in our own factory in Kreuzwertheim. My father, Josef Tischer, and I founded the company together and I took over management in 1991.

We now deliver TISCHER throughout Europe, but our demands on the quality of the materials have not changed. The construction has developed further over the years and we have been able to extend our product range bit by bit. The cabins are now produced in the modern sandwich construction which makes them lighter and sturdier.

I remember that we almost exclusively adapted the TISCHER cabins to VW platform trucks up until 1983.

We can now supply attachment cabins for almost all pick-up versions available on the German market, and obviously all vehicles as well. The full service is thereby guaranteed!

Our team is currently made up of 20 employees who build around 140 cabins per year and adapt them to the basis vehicle. They also deal with customer enquiries and are responsible for the service department. We generally do not need more than one week to procure any spare part customers may need. This is something we are proud of.

We want to continue writing the TISCHER success story. Proximity to the customers is therefore important. After all, they are the ones who know best what makes the difference with TISCHER leisure vehicles.

I hope you enjoy leafing through the catalogue and I wish you exciting travel experiences with your TISCHER cabin. We would be very pleased if you would share your holiday impressions and suggestions with us at www.tischer-pickup.com.

Yours,

Peter Tischer

OUR TEAM PHILOSOPHY

„WE ARE STRONG AS A TEAM“; and that doesn't just apply to teamwork in the factory at TISCHER. It means teamwork with the customer as well. We receive important suggestions and tips from our customers. Some of them cover several thousand kilometres per year with their pick-ups and TISCHLER cabin. There's nowhere else we can find more know-how.

For us, it is important to develop the TISCHLER cabins as close as possible to the real conditions in which they are used. Most TISCHLER drivers use their pickup each day to drive to work or as a leisure vehicle. After all, it cuts a good figure in all respects with its generous loading space and robust handling. Spontaneous holidays or longer periods of travel should therefore be possible without spending too much time on converting the vehicle.

TISCHER has constructed its models so that setting up and removing the cabin is possible within a few minutes and without converting the vehicle - even for those without experience. This increases flexibility at the holiday destination as well: the cabin is set down in just a few strokes of the hand and off you go with a full vehicle including loading space. This means all of the advantages of the pick-up are also available to you when away from home.

Because the TISCHER cabins can be used without too much interference with the vehicle, there's nothing in the way of reselling your pick-up. If you buy a new vehicle, we can attach the necessary devices within one day. Weeks long spent in the workshop for conversion? Not with us.

TISCHER are the perfect home away from home for individualists who want to fulfil their holiday dreams. Stop compromising. Comfort flexibility, off-road trip or cosy evening with a glass of wine – TISCHER leisure vehicles are the perfect holiday companion.

PICK-UP CABINS

TRAIL/BOX 200

With a total length of 3.5 metres, the TRAIL 200 is our most compact model and is therefore the perfect companion for active holidays. The tow bar is not restricted so boat trailers, horse boxes or other such equipment can be taken along without any problems. Despite the compact construction, the interior space of the TRAIL 200 is pleasantly spacious.

The TRAIL 200 can be used for all pick-ups with 1.5 or double cabins. If you use the TRAIL 200 with a 1.5 cabin, it almost seamlessly meets up with the trunk of the basis vehicle. The slope angle is not restricted making it perfect for off-road trips. With its low overall weight of less than 500 kg, it increases your loading scope. The TRAIL 200 is equipped with a back entrance. The middle seating area can be converted into an additional bed.

„Holiday time at last!
And my motorcycle
can come along too.“

Included as standard: refrigerator
Dometic RM 8401 (12 V / 220 V / Gas).

Cabin size

Alcove bed size 198 x 153 cm
Seating area bed size 198 x 120 cm

PICK-UP CABINS

TRAIL/BOX 220

The latest combination from Tischer GmbH: the Trail 220 cabin on the new VW Amarok. Cross-country tours are a dead cert with the VW Amarok. The safe off-road journey can begin with the basis vehicle and the pick-up cabin Trail 220.

Lowered with four manual jacks, the 220 model of Trail looks like it comes from a single mould. The 387 cm length living box consists of 34 mm thick sandwich panels with a stove-enamelled outer membrane. The cabin is not much wider than the basis vehicle. You enter through the trunk door into living area using a mechanically extending step with two rungs.

A wardrobe, on-board kitchen and water supply from a winter-safe insulated tank with 80 litre capacity are of course included. The sanitary room to the left behind the trunk offers a cassette toilet, wash basin, shower and mirror cabinet. A dining area provides space for four people.

..Whether mountain, valley or cross-country - everything is possible!"

Available in two versions.

PICK-UP CABINS

TRAIL/BOX 215/230

Both models, TRAIL 215 and TRAIL 230 (with back entry), provide the required living comfort in far-away destinations. The equipment in the living area with warm water system and the latest technology guarantees the best quality.

Both of these models are particularly good for all Japanese pick-ups with a double cabin driver cab. Our beautifully shaped and light box consists of sandwich panels with a stove-enamelled aluminium outer membrane which ensures the highest possible stability and a long service life. With the generously sized filling levels, such as the 80 litre fresh water and 2 x 5 kg gas bottles, even the longest journey becomes a pleasure.

„I always follow my nose, and keep things just as I like them!“

PICK-UP CABINS

TRAIL/BOX 240

Our BOX 240 with back entry has a special feature: it can be attached to a basis vehicle with 1.5 cabin and to double cabins. The basis vehicles with the different driver cabs can be exchanged. A lack of space is a thing of the past; the design of the equipment makes overnight stays a pleasure and the perfectly crafted and adapted furniture shows our huge experience in the construction of pick-up cabins.

This removable pick-up cabin was designed for all Japanese pick-ups. The box is made of sandwich parts with a smooth, stove-enamelled outer membrane. The cabin is insulated with 30 mm polystyrene solid foam in the walls, roof and floor. The inner cladding consists of a 3 mm thick coated plywood. The technology used and the careful production ensures the best quality, highest possible stability and guarantees a long service life.

„Breathe deeply
and relax. Wonderful!“

The cabins are fixed to the loading area on the pick-up on four retainers with tension sets or screw threads.

Cabin size

Alcove bed size 200 x 153 cm
Seating area bed size 198 x 113 cm
Length of interior floor 238 cm

PICK-UP CABINS

TRAIL/BOX 260S

No prayers are left unanswered. The range of use is wider than it looks. Our TRAIL 260 and TRAIL 260S (with side entry) offer the optimum in comfort and space for up to 4 people and also offer the option of being transported with a spacious pickup with a 1.5 driver cab.

The available space in the pick-up cabin offers sufficient living space for 4 people and is designed for basis vehicles with a large driver cab in which two other people, in addition to the driver and front passenger, have space for the next trip.

„Put your feet up
and relax after an
active day.“

PICK-UP CABINS

TRAIL/BOX 260RS

Robust yet comfortable – that is our Trail 260RS. A long trip is relaxing and soothing in this pick-up cabin - even if the trip takes you off-road or far away from civilisation.

This pick-up cabin has been specially designed for the robust and durable basis vehicle, the Land Rover Defender 130, and has therefore been adapted especially to the higher driver cab. Although these cabins generally correspond with the TRAIL 260, an additional height of 19 cm is achieved by adaptation to the driver cab of the Land Rover Defender. The resulting generous interior space allows lots of room for storage and a comfortable standing height of 212 cm. Models 200 and 240 are also available for the Land Rover Defender at an extra charge.

„Even if the going gets rough - nothing can stop me.“

PICK-UP CABINS

TRAIL/BOX 260SD

A holiday apartment for two: that is our pick-up cabin TRAIL 260SD. The available space including seated dining area, lots of storage space in the living area and a comfortable wash room with shower allows relaxing trips and holidays wherever you like.

There is also additional storage space in the back where the camping chairs and a table (standard features) are accommodated. With the 100 litre fresh water tank, 50 litre waste water tank and 2 x 5 kg gas bottles, very long journeys are possible too.

This box is also produced with sandwich panels. The insulation is made of polystyrene solid foam 30 mm panels in the walls, roof and floor. The highest possible stability and service life is guaranteed by the latest technology.

„Drive off spontaneously and find the best views. A real luxury.“

PICK-UP CABINS

TRAIL/BOX 275 S

Family holiday with a pick-up? Not possible? Of course it is. Our pick-up cabin, the BOX 275 S, is the mobile holiday apartment for a family of four. Developed especially for the large „1500“ full-size pick-ups, the BOX 275 S offers comfortable living and a generous amount of space.

The spacious pick-up cabin is suitable for American pick-ups with a six-foot loading space. Due to the high performance of the basis vehicles and the large driver cab, a holiday with the whole family or as a group is possible with the American pickups without having to do without holiday enjoyment and living comfort. The Trail 305 S pick-up cabin is suitable for American pick-ups with a 2500 chassis.

„I'm excited to see how the neighbours react.“

PICK-UP CABINS

TRAIL/BOX 280/280S

The TRAIL 280 with back entry and the 280S with side entry offer lots of space as well as living and driving comfort. For example, the walls are simply removed from a VW platform truck double cabin and the TRAIL 280 is attached. This means the pick-up cabin has enough space for 4 to 5 people.

An opening through to the driver cab can even be installed by changing the backrest on the back seat. The opening to the cabin is quickly and simply closed using a door and plastic panel. This means that the basis vehicle continues to be available for private or commercial use.

„Uncomplicated and spontaneous.
Just like us!“

Cabin size
Alcove bed size 208 x 153 cm
Seating area bed size 205 x 132 cm
Length of interior floor 280 cm
Box length 444 cm
Total width 218 cm
Total length 615 cm
Total height 307 cm
Standing height 203 cm
Suitable basis vehicles
VW T4/ T5 individual cabin, short wheelbase VW T4 / T5 double cabin
Box
Modern sandwich construction
Stove-enamelled, smooth aluminium outer membrane
30 mm solid foam insulation
3 mm poplar plywood inner cladding
Multi-coloured exterior design
Accessible roof

TRAIL-LINER

THE LUXURIOUS TYPE OF MOBILE TRAVEL

Comfortable living, safe driving and absolute flexibility at the holiday destination – all of this is offered by our new model, the TRAIL-Liner. Developing a motorhome as a 5th wheel trailer was the logical consequence of our almost 40 years of experience in the area of designing and producing pick-up cabins.

Technical Data

Total length: from 4.00 m to 5.50 m

Total length including gooseneck: from 5.50 m to 7.00 m

Box width: from 2.10 m to 2.40 m

Box height: from 3.00 m to 3.50 m depending on the basis vehicle

In addition, the demand for generous living comfort at the holiday destination and the independence of a pick-up cabin is very high. The resulting a 5th wheel trailer is aligned to European road conditions in its size and is suitable for the basis vehicles known on the European market. With our experience and the „Made in Germany“ quality, there’s nothing left in the way of new dimensions in mobile travel.

Empty weight: from 1,600 kg to 2,000 kg depending on the box length and equipment.

Authorised total weight: from 2,600 kg to 3,500 kg, depending on the equipment and maximum possible total drawing weight of the drawing vehicle.

„More luxury? I certainly wouldn't mind, but it needs to be flexible.“

Box

- Modern sandwich construction
- Stove-enamelled, smooth aluminium outer membrane
- 30 mm solid foam insulation
- 3 mm poplar plywood inner cladding
- Accessible roof
- SEITZ/Dometic anti-thermal-bridge double glazed window with mosquito net and blackout
- Double-wall, insulated GFK moulded parts
- Insulated, heatable double floor with integrated fresh and waste water tank (250/200 L) over the axles
- Large storage space in the back and front. Trunk lid as access to all storage spaces (double floor, back and front), gas bottle box and cassette WC with lock.

Living area

- Decorative coat on interior walls
- PVC floor covering
- Furniture made of light poplar plywood with modern easy-care coating
- Cupboards with sturdy furniture handles and safe closing mechanisms
- Kitchen furnishings and freestanding table with durable surface
- Winter backrests
- 12 cm thick padding made of high quality foam (optimal formed padding)
- Covers with modern design, detachable with zips
- Curtains on living area windows
- Back seating area for conversion into a bed as an option

Sleeping area

- Large, heated double bed 200 x 160 cm or 2 single beds 200 x 90 with FROLI-Star slats
- Storage space, shelf options
- 2 reading lamps
- One window on the left and right

Kitchen

- Large working surface with high-quality mineral worktop
- Ignition-safe 3 flame gas hob with electronic ignition
- Sink with integrated glass plate
- Single lever mixer tap
- Dometic refrigerator RMD 8505, 150 litres with Separate freezer compartment, 25 litres, operated with 12 Volt, 230 Volt and gas
- Storage space, wall cabinets and shelf

Washroom/shower

- Separate shower opposite living area
- Cabinet with high-quality mineral board
- Stainless steel washbasin with a single lever mixer tap
- Mirror
- Wall cabinet
- Cassette WC Thetford C403
- Shower tray 80 x 70 cm
- Sliding shower door
- High-quality spray fitting with single lever mixer tap

Technology/gas system/water supplier/heating

- 12 Volt lighting
- 230 Volt system

Board control system

- 2 AGM batteries 95 AH
- Freshwater/wastewater tank 250/200 litres, insulated and heated
- Truma Kombi 6 heating/warm water unit
- Gas bottle box for 2 x 11 kg gas bottles
- Truma Secumotion gas controller system with Duocomfort

Individual equipment/options

- Layout according to your specifications
- Ready laid laminate parquet
- Truma Kombi 6 heating with 230 volt operation
- Alde Compact warm water heating
- Underfloor heating
- Waeco MDC 110 compressor refrigerator
- Microwave
- Ceramic toilet with fixed tank and slide valve
- Aluminium trims

*„It couldn't be more flexible:
the cabin is on within 20 minutes
and off you go!“*

ACHIM VÄTH, VEHICLE MECHANIC AT TISCHER

CABIN BOX SERVICE

You don't need to be an expert to attach or remove the cabin. With the help of extending supports, it's very easy and you can manage it within 20 minutes with a little practice.

To take the cabin off, you only need to loosen the retainers between the cabin and the pick-up and lower the four jacks. The jacks are lowered to the ground with a crank, or a battery-powered or electric screwdriver. Extend a little further until the cabin comes away from the vehicle. Now you can drive forwards with the pick-up and lower the cabin down a little more for convenient entry.

Attachment works in exactly the same way but in the reverse order: raise the cabin so that the pick-up fits underneath. Then drive the vehicle under the cabin - you need a little patience at first but you will soon have the knack. Now lower the cabin again, tighten the retainers, insert the 12 V plug and retract the supports. It isn't witchcraft, is it?

OUR GUARANTEE AND OUR SERVICE PROMISE

We write Service with a capital S. We are always at your side with help and advice. We are also well equipped to provide full assistance. Alongside our attachment cabins, we recommend and sell the right pickups for your requirements. We can offer you all of the common pick-up vehicle models. You are completely taken care of and supplied with the right vehicle! We give a six-year warranty on the outer membrane. One condition is a leak test after three years so that you can enjoy your TISCHER cabin for a long time!

INTERIORS SERVICE

We attach great importance to our interior features – we want you to feel happy on holiday after all! We put a lot of hard work into planning our interiors. All of the important things should be in the right place, within reach and intuitive. At the same time, we want to offer you the freedom of attractive surfaces and cosy seating. Although it sounds like trying to square the circle, I think we've managed it quite well. We are particularly proud of details such as the large foldaway washbasin in the wet cell.

„It should be space-saving and cosy. We are always working on it!“

ERWIN BARTSCH, INTERIOR PLANNER AT TISCHER

„The walls, roof and floor of the cabin are built like a sandwich.“

THEA HASELOFF, CONSTRUCTOR AT TISCHER

CONSTRUCTION SERVICE

We personally manufacture the individual elements the TISCHER cabins are made of. We use aluminium sheet metal, solid foam and interior plywood boards applied under pressure to the whole surface. This creates a sandwich material which is light and extremely sturdy and durable at the same time. Individual panels are glued together and screw connected into a box shape. The walls and roof are 34 mm thick and the floor is 41 mm. The material has the best insulation values and is easy to repair in case of any damages.

We can fill little damages in the outer membrane of your cabin and repaint it. We simply replace the individual sandwich elements for larger damages.

ANGULAR ROUND ALCOVE TWO BOX VERSIONS

BOX-VERSION

The BOX-Version is a simpler, less expensive but just as high quality cabin. The structure of the wall with the sandwich panels with 30 mm solid foam insulation and a smooth aluminium outer membrane is identical to the TRAILVersion. Due to the square construction, the cabin appears to be larger and does not have the excellent aerodynamics of the TRAIL-Version.

TRAIL-VERSION

Two double walled, foam filled GFK moulding parts are used for the round Alcove that form the corners of the Alcove and the back. With these parts and the round sandwich roof and sidewall transition points, a beautifully shaped and modern structure is created. The front and back connections are also rounded without the use of a frame. This cabin concept creates excellent aerodynamics that is not only noticed in the consumption of diesel.

„Our loading surface coating from Rhino Linings offers perfect protection including anti-slip effect and noise absorption.“ **ALEXANDER FRIESEN, SERVICE EMPLOYEE AT TISCHER**

LOADING AREA COATING SERVICE

Another service we provide is a spray coating on platforms and loading surfaces. Rhino Linings is a company from the USA which has been using polyurethane to coat truck loading surfaces since 1988. The air and water impermeable material is an excellent alternative to the standard loose surface cladding. The high level of satisfaction among customers with this product is still noticed years later. Alongside excellent resistance to slipping and the absorption of noise, coatings from Rhino Linings provide a permanent good look.

SPARE PARTS SERVICE

It goes without saying that we are available with our service after the purchase of TISCHER cabin. If you require assistance from one of our service employees, a phone call is usually enough. Individual and spare parts can generally be procured within one week. We already have many of them available from stock.

„Individual and spare parts can generally be procured within one week. This is something we are particularly proud of.“

PAUL BÜHLMANN, SERVICE EMPLOYEE AT TISCHER

OPERATING INSTRUCTIONS

Once your cabin has been purchased and handed over, you receive a truly comprehensive book with our operating instructions for your cabin and all operating manuals for the technical equipment and installations. With these instructions for use, you are capable of helping yourself when something doesn't work in the right way. Wherever you are in the world and whether calling us as possible, you will always have initial assistance and instructions for your own repairs. We achieved an exceptional acceptance level in the area of pickup cabins with these instructions put together especially for our customers. We only want the best for our customers!

„Help is always on hand with our unique, comprehensive operating instructions.“

THOMAS KLEIN, SALES MANAGER AT TISCHER

INDIVIDUAL VEHICLES CUSTOMISATIONS

STANDARD & L EQUIPMENT SERVICE

Entrance doors with security lock and mosquito blind
Windows and waste bin

On-board control system for fresh/waste water tank,
Box/vehicle battery, 12 V main switch and
water pump switch (not on TRAIL / BOX 200)

Dometic RM 8401 L, 88 litre absorber refrigerator
(Included as standard in TRAIL / BOX 200)

Truma E-2400
(Included as standard in TRAIL / BOX 200)

Mini Heki

SecuMotion gas controller

Bed with slats and warm air supply
(No warm air channelling on TRAIL / BOX 200)

Fold-away wash basin (not in TRAIL / BOX 200)
